2. Read the passage carefully and answer the questions that follow :

The Taj is a splendid piece of art. It is situated on the bank of the Jamuna river. The monument was built by Moghul emperor Shah-Jahan on the death of wife Mumtaz Mahal. The Taj is a standing monument of pure love. The Taj is on a raised platform. This building is of white marble, there is spacious hall. In the hall, the queen was buried. The windows are made of fine marble screen. There are beautiful flowers, captivating designs, some other prices of Mughal grandeur on the walls of the Taj. There are also precious stones of different colours. The walls are decorated and engraved with verses from the Holy Quran. The monument stands as a striking wonder in a beautiful and very big garden. In the middle, there is a big white dome. There are four tall and magnificent minarets on the sides. If

looks really wonderful in the rays of the setting sun. In a full moon light, it looks more impressive, its beauty is beyond the description.

The beds of flowers in the lawns are attractive and the beautiful colours captivate the visitors. Through the garden runs a channel of

clear water. The Taj looks more beautiful in midst of fountains playing day and night. The main building stands over a basement in a rectangular shape. The Taj is a fantasy, a dream in marble as it shines in the moonlight. It possesses an artistic beauty. The tombstone bears the words "Mumtaz Mahal lies here and God alone is powerful".

The Taj is one of the seven wonders of the world simply because of its overwhelming beauty. It is beautiful to look at from a distance. It is wonderful from up close. To think that its walls were studded with

actual jewels (that were ransacked) at one time makes one imagine :  
if it is so beautiful even today, surely it would have been even more  
so before the ransacking took place. <http://www.jkboseonline.com>

Then of course there is another print : the artistry that went into its  
making, the knowledge of its architects and engineers in dealing with  
problems of creating a structure that was almost everlasting with the  
minimum of maintenance keeps on inspiring architects engineers till  
today.

*Questions :*
